## Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

## **DETAILED ACTION**

### ***Drawings***

1. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on December 12, 2002 have been approved. A proper drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The correction to the drawings will not be held in abeyance.

### ***Response to Arguments***

2. Applicant's arguments and remarks in view of amendments see paper 16, filed June 13, 2003, with respect to claims 1, 9, 23 – 24, 26 – 27 have been fully considered and are persuasive. The final office action of March 11, 2003 has been withdrawn.

### ***Allowable Subject Matter***

Claims 1 – 9, 23 – 24, 26 – 27, 32 – 33, 35, 37 – 39 and 41 are allowed. (Renumbered as claims 1 – 20).

3. The following is an examiner's statement of reasons for allowance: prior art fails to teach or fairly suggest an image processing method comprising; an evaluation step, which calculates a value representing an irradiation end, the representative value is calculated from first differential values; a step of judging an edge point of an irradiation area from the value calculated in the evaluation step as recited in independent claims 1, 23 and 26.

Art Unit: 2625

Although Takeo discloses that the presence or absence of a limited irradiation field is judged by comparing a representative value of an image signal, which corresponds to an overall or part of peripheral portion, with a representative value of the image signal corresponding to the overall area or approximately a center portion. However, Takeo fails to judge whether an irradiation end is present in the overall or part of peripheral portion. Moreover, Takeo fails to judge the location of the irradiation end in the image.

As to independent claims 9, 24 and 27, prior art fails to teach or fairly suggest an image processing method including an evaluation step, which calculates an evaluation value for evaluating positional relations among coordinates of edge point candidates; a judging step of judging whether photographing is performed by an imaging device having an irradiation diaphragm function in a state of irradiation diaphragm or in a state of no irradiation diaphragm, base on the evaluation value calculated in said evaluating step.

Although, Takeo discloses that candidates for a contour of an irradiation field are obtained, and that the contour of the irradiation field is obtained from among the obtained candidates. Takeo detects the contour of the irradiation field from the photographed image having a previously diaphragmed irradiation area. However, Takeo fails to disclose a judging step of judging whether photographing is performed by an imaging device having an irradiation diaphragm function in a state of irradiation diaphragm or in a state of no irradiation diaphragm, base on the evaluation value calculated in said evaluating step as recited in independent claims 9, 24 and 27.

Art Unit: 2625

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
